AUTHOR DeSalvatore, Kristen; Hughes, Linda
TITLE State-Funded Scholarship/Grant Programs for Students To Attend Postsecondary Education Institutions. National Association of Student Grant & Aid Programs (NASSGAP) 26th Annual Survey Report, 1994-95 Academic Year.
INSTITUTION New York State Higher Education Services Corp., Albany.
PUB DATE Feb 96
NOTE 53p.; For the 1993-94 report, see ED 371 701.
PUB TYPE Statistical Data (110) -- Reports - Descriptive (141)

EDRS PRICE MF01/PC03 Plus Postage.
DESCRIPTORS Educational Trends; *Grants; Higher Education; *National Surveys; *Scholarships; *State Aid; *State Programs; *Student Financial Aid; Trend Analysis

ABSTRACT

This report presents data for the 1994-95 academic year on state-funded student aid in 13 tables. States awarded over $3 billion in student aid to over 1.8 million students, an increase of 8 percent over 1993-94. Of this award, 78 percent was need-based aid to undergraduate and graduate students, while 13 percent was non-need-based, and 9 percent fell in the category of "other aid." Of the $2.5 billion in need-based aid available, 99 percent went to undergraduates. Of the $407 million in non-need-based aid, 91 percent went to undergraduates. Five states (California, Illinois, New Jersey, New York, and Pennsylvania) collectively awarded $1.5 billion in undergraduate need-based aid, comprising 61 percent of the total awarded in this category. A number of states increased their effort significantly between 1988-89 and 1994-95, increasing expenditures by 100 percent or more over the period. These states were Alaska, Arkansas, Florida, Georgia, Kansas, Louisiana, Maine, North Dakota, Virginia, Washington, and West Virginia. Five states reported an increase in need-based undergraduate funds of more than $20 million over 1993-94 levels. These states were California, Illinois, New Jersey, Pennsylvania, and Virginia. The tables provide detailed data by state and also show data for previous years for comparison. (DB)

Executive Summary	1
Table One Estimated Total Grant Aid Awarded By State Programs, 1994-95	2
Table Two Actual 1988-89, 1991-92, & 1994-95 Need-Based and Non-Need-Based Grant Aid Awarded to Undergraduate and Graduate/Professional Students, By State	3
Table Three State Student Incentive Grant Program Activity By States	4
Table Four Other Programs Administered By The State Agency	5
Table Five Selected Program Characteristics, 1994-95	11
Table Six 1994-95 Number and Percent of Awards and Dollars by Sector for Comprehensive Undergraduate Need-Based Scholarship and Grant Programs	18
Table Seven Comments To Better Understand Agency Positions	22
Table Eight Aggregate Dollars of Awards for Undergraduate Need-Based Grant Programs, By State, Grouped by Award Dollar Volumes, 1989-90 to 1994-95	26
Table Nine Estimated Grant Dollars Per Resident Population, 1994-95, By State	28
Table Ten Estimated Grant Dollars Per Resident College-Age Population, 1994-95, By State	29
Table Eleven Estimated Grant Dollars to Undergraduates in 1994-95 Per Full-Time Undergraduate Enrollment, By State	30
Table Twelve Estimated Percentage of Full-Time Undergraduates Receiving Grant Awards in 1994-95, By State	31
Table Thirteen Total State Grants As a Percentage of Appropriations of State Tax Funds for Operating Expenses of Higher Education in 1994-95	32

Executive Summary

The 26th Annual NASSGAP Survey Report of the 1994-95 academic year is a streamlined version compiled and published for the first time by the New York State Higher Education Services Corporation (HESC). The Report has been compiled and published in previous years by the Pennsylvania Higher Education Assistance Authority (PHEAA) and originally by the Illinois State Scholarship Commission.

The data and tables represent actual 1994-95 academic year data. Unlike past year reports, current year estimates are not included.

In the 1994-95 academic year, the states awarded over $3 billion in student aid to over 1.8 million students, an increase of 8% over 1993-94. Of the amount awarded, 78% was need-based aid to undergraduate and graduate students, while 13% of it was non-need-based aid to undergraduates and graduates (the remaining 9% fell in the category of "other aid"- see Table One).

Of the $2.5 billion in need-based aid available, 99% went to undergraduates. Of the $407 million in non-need-based aid awarded, 91% was awarded to undergraduates.

Five states (California, Illinois, New Jersey, New York, and Pennsylvania) collectively awarded $1.5 billion in undergraduate need-based aid, comprising 61% of the total awarded in this category.

A number of states increased their effort significantly between 1988-89 to 1994-95, increasing exenditures by 100% or more over the period. These states were: Alaska (+860.3%), Arkansas (+113.1%), Florida (+103.7%), Georgia (+506.4%), Kansas (+120.2%), Louisiana (+388.8%), Maine (+402.5%), North Dakota (+106.9%), Virginia (+247.8%), Washington (+320.2%), and West Virginia (+203.3%).

Five states report an increase in need-based undergraduate funds of more than $20 million over 1993-94 levels. These states were California (+$24.1 million), Illinois (+$29.5 million), New Jersey (+$24.4 million), Pennsylvania (+$29.9 million), and Virginia (+$47.5 million).

Additional copies of this report may be obtained for $5.00 per copy by sending a check made payable to New York State Higher Education Services Corporation (HESC),
99 Washington Avenue, Room 1438, Albany, NY 12255, Attention: NASSGAP.

Table Seven

Comments to Better Understand Agency Positions

California

State grant increases have been tied largely to public institution student fee increases but the maximum award for private institutions and the number of authorized awards has not increased since 1989.

Colorado

Up to 30% of Work-Study allocation may be spent without regard to need.

Connecticut

The Scholastic Achievement Grant Program is the only centrally administered Program. The CICS and CAPS Programs allocated funds to Connecticut colleges and Connecticut students apply to these funds through the college financial aid office.

Florida

State Tuition Voucher was renamed Florida Resident Access Grant.

A new minority program was funded, Rosewood Family Scholarship.

Some funding was provided for the Occupational Therapy/Physical Therapy Programs, which are designed to attract these professionals to seek employment in the public school system.

Florida's four historically black colleges, which participate in the Mary McLeod Bethune Scholarship, are now playing a larger role in administering the program.

With the funding of additional minority law school scholarships, administration of the Virgil Hawkins Fellowship has been transferred entirely to the Florida Education Fund, a state-created nonprofit entity which administers a variety of minority programs.

Georgia

The 1994-95 year was the second year of the HOPE Scholarship Program, which is funded by the Georgia Lottery for Education. There are four components, one for public college students, one for private college students, one for public technical schools, and one for GED recipients.

Iowa

Fiscal year 1995 appropriations for need-based state student aid programs increased by $937,000, a 2.85 percent increase over FY'94 funding.

Massachusetts

Goal of programs are to promote access and choice. Funds are awarded to neediest students based on an indexing system. Award levels reflect student cost of attendance at institution type (public vs. private).

Michigan

Appropriations and expenditures in the Competitive Scholarship Program (CSP) and the Tuition Grant Program (TGP) pose problems for statistical reports. Part I, Page 1, identifies appropriations and Part IV identifies actual expenditures. Our TGP appropriation supplements awards in the CSP, so dollars paid out in CSP are higher than appropriation. The TGP dollars paid out are less than appropriation as the difference is paid to CSP recipients. When identifying increases or decreases in funding levels for states, Part I should be used.

Minnesota

Decreased volume in SELF loans attributed to common application form for Stafford Un-Sub loan.

Mississippi

Effective July 1, 1991 the Mississippi Legislature passed new legislation regarding state student financial aid policies entitled the Omnibus Loan or Scholarship Act of 1991 ("Omnibus").

The Legislature found that as a result of restrictive and punitive provisions contained in the loan or scholarship programs in existence prior to passage of Omnibus, there were low levels of utilization of programs by the eligible student population. The Legislature also found that programs being enacted at various times and for various specialized purposes had inconsistencies in the provisions for their administration. Monies dedicated for use in student loans or scholarships needed improved methods of utilization. Older existing revolving funds needed to be collapsed and consolidated into a single revolving fund.

Omnibus allowed for consistent, uniform, and regular student financial aid programs. The Law collapsed and consolidated program funds into a single revolving fund. The Law allowed for the creation of additional scholarship programs for the purpose of encouraging eligible Mississippi residents to enter into professional schools and encouraged the participation of minorities in graduate, professional programs in the institutions of Mississippi. The Board of Trustees of State Institutions of Higher Learning (the "Board") was granted the power and authority to create and implement new loan or scholarship programs as they may be needed. The Law created an ability within the Board to fashion new and innovative systems for the financing of loan or scholarship programs by continuing the use of private sector loans for education and federal guaranteed student loans with scholarship repayment provisions promulgated by the Board. The Board was

granted authority to devise and develop innovative systems to obtain the most efficient use of state funds to encourage entry and service in certain professional fields.

In the years since the Omnibus enactment, continuing programs have expanded, additional programs have been created, and expenditure of funds has been increased.

Montana

Programs are decentralized, central office distributes funds (Federal and/or State) to eligible institutions who award aid to eligible students.

New York

No major increases or decreases were enacted for the 1994-95 year.

Ohio

Adoption of the Federal definition of an independent student has resulted in a significant shift in state grant benefits to these students. This may become a policy issue in the next biennial budget session.

Oregon

Due to statewide reductions in funds, several of our core grant programs have been eliminated. Their loss resulted in fierce competition among educational segments for the remaining dollars.

Pennsylvania

For the first time, students enrolled on a part-time basis became eligible for the State Grant Program, with the passage of authorizing legislation in October 1994. The program was immediately implemented, and targeted the lowest income students enrolled on a less than full-time but at least half-time basis.

Puerto Rico

Legislative Grant is the matching State source for SSIG. Funds are matched $1 per $1. The Supplmentary Aid Program is administered by the State University (University of Puerto Rico) and is therefore available only for UPR students.

South Carolina

Available funds in 1994-95 were used to award all eligible applicants through June 30 of the year. Percentage of tuition being covered by the grant continues to decrease as funding of program does not keep pace with tuition increases at the colleges. Average of 24.7% of tuition was covered by the grant in 1994-95, compared to 80% in initial year of the program (1970).

Utah

Utah has an extensive tuition waiver program in its nine public colleges and universities, not included in this survey because it is administered by the institutions. Up to 10 percent of assessable resident tuition may be waived for "meritorious" or "impecunious" students. Majority of use is based on merit, but many recipients also qualify for need-based aid.

Vermont

VSAC is a comprehensive agency that provides career counseling and financial aid information to middle schools, high school, and adult students. VSAC provides grant programs for students enrolled in full-time, part-time, and non-degree courses and programs. VSAC also serves as a guarantor for Vermont's students and institutions, and provides loan capital through its Education Loan Finance Program.

Washington

Total state effort includes aid dollars derived from tuition and fees at the public colleges, which, by definition, are not administered by this agency and therefore are not included in this survey. The total of public college student financial aid, administered by the colleges in 1994-95, was approximately $17 million. This is in addition to about $65 million in grant and work programs appropriated to this agency for statewide programs.

West Virginia

The '94-95 school term was the second year of a five-year funding improvement plan for the Program. Although the recommended annual increase was set at 1.5 million, the level has not been reached during the initial two years. The Program was level funded during '93-94, but was increased by $750,000 in '94-95. Major policy change occurred in the selection process. Established common pool for ranking purposes, thereby eliminating the preferential treatment previously granted to prior recipients.

Wisconsin

The Nursing Student Stipend Loan, a loan forgiveness program, is being phased-out.
